

## Alliance 372 AGRIFLEX (IF) – walks the talk in France

**Customers:** Mr. Hervé & Bertrand DUPREZ  
**Location:** Northern Region - France  
**Machine used:** Renault Atles 936 RZ  
**Application:** Agriculture & Allied  
**Tires in use:** 372 AGRIFLEX  
**IF 600/70R28 164D (Front)**  
**IF 800/70R38 CFO 184A8 (Rear)**

The Duprezs', Hervé & Bertrand are farmers in the Northern region of France. They own and cultivate a 350 hectare farm in which they have 220 hectares of wheat, 80 hectares of sugar beet and 50 hectares of rape seed.

In June 2014, they equipped one of their Renault Atles 936 RZ with Alliance 372 AGRIFLEX the Improved Flexion technology tyre. The tractor was earlier shod with Goodyear rubber. The sizes are IF 800/70R38 184A8 CFO 372 AGRIFLEX (Rear) & IF 600/70R28 164D 372 AGRIFLEX (Front). Since then the tyres have completed more than 800 hours in the tractor. The rear tyres run on an air pressure of 1.3bar and the front tyres with 1.2bar.

They have used the AGRIFLEX shod tractor for all kinds of agricultural works like beet seeding, fertilizer spreading, rape seeding, cereal seeding, sugar beet harvest and for towing trailers during harvest.

This is what they have to say about the tyre; "These tyres **are perfect for all of our applications**, and we saw the benefits of the low pressure with the IF technology on the ground, especially when we saw the sugar beets after the seedling, they have the same size behind the tires than the others. Due to the low pressure we are **very satisfied about the traction, self-cleaning during the sugar beet harvest** and the good comfort on the road with the trailer. The wear is also good, **only 4 mm lost for 800 hours** of work even we have stones on our fields"

**The Duprezs' with their trailer shot with Alliance 380 HD Agri-Transport tyre**

**High flexing 372 AGRIFLEX increases contact area significantly and thus reduces ground pressure.**

372 AGRIFLEX is a large volume Improved Flexion tyre designed for use in High HP tractors (Like the 250HP Renault of the Duprezs') and combine harvesters. The tyres are rated at 'D' speed rating and can be driven at speeds up to 65kph on road. This radial tyre is steel belted, which provides even ground pressure and superior resistance to punctures.

Sizes - 372 AGRIFLEX	
420/85R28 IF	520/85R38 IF
600/70R28 IF	710/85R38 IF CFO

800/70R32 IF CFO	710/75R42 IF CFO
650/65R34 IF CFO	

Alliance AGRIFLEX Improved Flexion tyres are designed to have minimum possible soil compaction even when they can carry higher load, up to 20% more than conventional radial tyres. They can also carry same load as conventional tyres with 20% lower air pressure. This enables the tyre to have a larger footprint thus minimising ground pressure and consequently lesser soil compaction damage.

## ATG

Alliance Tire Group specializes in the development, manufacturing, and marketing of tires for Agriculture, Forestry, Construction, Industrial, Earth Moving and OEM applications, under the Alliance, Galaxy, and Primex Brands.

Backed by nearly 60 years of experience, Alliance Tire Group serves customers in 120 countries and offers a full spectrum of products, from basic entry-level tires to a broad range of superior quality value-added products.

All of the Group's tires are developed and tested at its advanced R&D centers.
