

Galaxy Hulk L-5: The right tyre for tough jobs.

Customer: S Brown (Paving) LTD
Location: Derbyshire, United Kingdom
Machine used: JCB 1CX - SKIDSTEER
Application: Road construction & allied
Tires in use: Galaxy Hulk L-5

The Hulk L-5 the premium skid steer tyre from Galaxy is no stranger to tough jobs. It has been proving that its performance is second to none anywhere in the world. It now has now won over S Brown (Paving) LTD of Derbyshire, UK. This is what their director has to say about this tough tyre:

Six months after taking delivery of a new JCB 1CX SKID STEER it became apparent that disappointingly we would need new tyres after only approx 80 hours of use. After some research and discussion with our tyre distributor we fitted Galaxy Hulk. These tyres have turned out to be more robust and stand up very well to the job that the skid steer has to do. We have not experienced any of the problems suffered by the original factory fitment. We would highly recommend the tyres for this application as although more expensive initially, work out to be better value in the longer term. When the Galaxy Hulk eventually wear out we will request replacements be the same.

S BROWN / Director

Wingerworth Tyres, who supplied S Brown (Paving) Ltd with the Hulk add:

Following the very successful fitment of the Galaxy Hulk tyre on a skid steer machine at the above location, Wingerworth Tyres will be recommending the Galaxy Hulk for harsh and arduous working conditions where a standard tyre is not suitable.

Wingerworth Tyres / Chesterfield

The Galaxy HULK L-5

The Hulk has a unique tread pattern that allows it to operate in severe applications while providing superior self cleaning characteristics. The Hulk has a superior L-5 tread depth and a class leading lug to void ratio. Because of the deep tread depths and solid to void ratio, the Hulk L-5 will provide extraordinary hours of service and reduces downtime due to cuts and punctures. The Hulk is the choice of leading OEMs around the world and contractors in the construction and asphalt reclamation business.
