

Alliance Forestry Tyres Tackle the Alpine Forests.

Customer:	Bernard Roudet
Location:	L 'Isle, France
Machine used:	Fendt 930
Application:	Forestry & Agricultural contracts
Tires in use:	Alliance Forestar F342 Alliance 365 Agro Forest

The Enterprise Bernard ROUDET is a forestry and agricultural contractor company that does pruning, grinding and transport. They are located at L 'Isle, UGINE (73), in the East of France, close the Alps.

This is the second time an Alliance tyre has equipped the firm's Fendt 930, 310 HP MFWA tractor. Earlier the tractor had 600/65-34 F346 on the front and 710/70R42 F365 in the rear axle. Currently it is fitted with 600/65R34 165A8 F342 in the front and in the rear a pair of 710/70R42 173A8 F365s do duty. The design of the F365 allows the tractor to be used for forestry and agricultural activities. Alliance is the only brand to propose this radial size for the forestry and agricultural applications.

His forestry trailers are equipped with Alliance 328 12 PR flotation tyres in size 500/50-17.

Gregory, the tractor driver, who has used the machine with a diagonal tyre in the front axles says that the radial on the front give him a better working comfort. For Bernard ROUDET, this is "one winning choice" because the tractor is multi-application and he has reduced his expenses of repair compared with classic agricultural tires. The previous Alliance equipment made 3000 hours in a very tough forestry terrain and stony surfaces without any puncture. "The tyres performed much more when compared to the competitor's brands. It's the reason why I decided to fit Alliance again!", adds Roudet.

Two years earlier, spurred by this good experience with the Alliance tyres Mr. Roudet bought a large triple axle 24 tonne Record dumper fitted with 6 178D Alliance 390 HD Flotation Radial tyres in size 650/55R26.

The firm has:

1. Two tractors
2. One excavator
3. One backhoe loader
4. Two trailers
5. Three spreaders
